When cleaning 2 & 5 ton grape bins, have you ever wondered why all of that rinse water and other material should end up in your receiving hopper? The **"BRIX BUDDY"** is our innovative solution to that problem.

The **"BRIX BUDDY"** is a rolling rinse water diverter that attaches to the top of your receiving hopper. It rolls along the length of the hopper to divert rinse water away from the hopper while washing gondolas. When you are done it rolls out of the dump zone until you are ready for the next bin. The **"BRIX BUDDY"** protects your investment from rinse water, foreign material, and sediments.

We can fabricate a **"BRIX BUDDY"** for almost any existing receiving hopper regardless of who originally manufactured it. Give us a call for further information and pricing.

LIGHTWEIGHT • ROLLS SMOOTHLY

AFFORDABLE • PROVEN DESIGN

THE "BRIX BUDDY" IS A P&L SPECIALTIES PROPRIETARY DESIGN.
