The **P&L SPECIALTIES ULTRA PREMIUM SORTING SYSTEM** is designed to provide complete fruit sorting and delivery capabilities. The versatile system can be configured to deliver fruit to either a de-stemmer or a small press. This uniquely designed Incline Sorting Table uses a flat belt and a gentle incline to provide unequalled sorting ability and quality.

A P&L Specialties Destemmer Stand is an essential part of the system. Its rugged design provides a stable base for the de-stemmer and uses 6" premium lockable swivel casters.

P&L Specialties LT™ (Le Trieur™) is designed to be mounted underneath or downstream of your de-stemmer, this machine's innovative design allows unripe "shot" berries, stem jacks, raisins and Material-Other-than-Grape (MOG) to pass through a wedge-wire screen.

To ensure the ultimate in quality, our system includes our Post De-stemmer Sorting Table to remove any unwanted "jacks", sheared stems, rejected berries, or leaf from the de-stemmed fruit. This table was specifically developed to meet the demanding needs of the ultra premium winemaker. Its unique design features raised sidewalls to contain valuable juice and to provide product separation for excellent sorting results. Also offered is an optional crusher-roller unit for the occasion that you want or need to gently break your berries. For the winemaker looking for the most gentle must pump, our peristaltic pump is key.

Some of the finest wineries in the world are using the **P&L SPECIALTIES ULTRA PREMIUM SORTING SYSTEM**. It is a complete system with unequalled quality, craftsmanship and value.
